Equine Recreational Therapy

The connection between horses and those seeking therapy is remarkable. Horses possess a natural sensitivity that allows them to recognize and respond to feelings of anxiety and stress. They provide a source of safety and comfort, fostering an environment of healing. Working with these majestic animals also helps individuals develop vital skills such as trust, communication, and teamwork. Equine therapy encourages emotional exploration and the development of effective coping mechanisms. If you are a veteran or first responder interested in exploring the benefits of equine therapy, we encourage you to reach out to us using the provided contact information.
